

Voice and Swallowing Center

At the Voice and Swallowing Center, we understand the importance of your voice, especially for patients who rely on their voice for their career and livelihood. The voice can be one a person's most defining characteristics and helps us express ourselves on a daily basis, while swallowing aids us in tasting and consuming our food.

Our doctors are specially trained to handle a wide range of voice and swallowing disorders, and strive to offer patients the most advanced, minimally invasive treatments that allow them to restore their voice and swallowing abilities, and allow them to once again enjoy activities such as eating, speaking and singing.

The Voice and Swallowing Center is headed by **Dr. Reena Gupta**, one of our most esteemed physician, who are experienced and fully knowledgeable about voice and swallowing disorders.

Some of the conditions we commonly treat at the Voice and Swallowing Center include:

- Hoarseness
- Laryngopharyngeal Reflux
- Care of the Professional Voice
- Transgender Services

If you are interested in learning more about the services offered at the Voice and Swallowing Center at OHNI, [please call us today to schedule an appointment.](#)
